Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Functional status	2
4.1 General.....	2
4.2 Functional status 1 (FS1).....	3
4.3 Functional status 2 (FS2).....	3
4.4 Functional status 3 (FS3).....	3
4.5 Functional status 4 (FS4).....	3
4.6 Functional status 5 (FS5).....	3
5 Supply voltage range	3
6 Functional categories	5
7 Operating modes	6
8 General tests conditions	6
8.1 Standard tolerances.....	6
8.2 General values.....	7
8.3 Sampling rate and value resolution.....	7
8.4 Description of interfaces.....	7
8.5 Restrictions on performing the tests.....	7
8.6 Number of tested samples.....	7
8.7 Test voltages.....	7
8.8 Test procedure.....	8
8.9 Parameter check.....	8
8.10 Continuous parameter monitoring with drift analysis.....	9
8.11 Physical analysis.....	9
9 General requirements	10
9.1 General.....	10
9.2 Prerequisites regarding the system in which the component is applied.....	10
9.3 Component requirements.....	10
10 Tests and requirements	11
10.1 Test-01: nominal voltage range.....	11
10.1.1 Purpose.....	11
10.1.2 Test.....	11
10.1.3 Procedure.....	11
10.1.4 Requirement.....	12
10.2 Test-02: lower and upper transitory voltage ranges.....	12
10.2.1 Purpose.....	12
10.2.2 Test.....	12
10.2.3 Procedure.....	13
10.2.4 Requirement.....	14
10.3 Test-03: short term overvoltage.....	14
10.3.1 Purpose.....	14
10.3.2 Test.....	14
10.3.3 Procedure.....	15
10.3.4 Requirement.....	15
10.4 Test-04: supply component load dump control test.....	15
10.4.1 Purpose.....	15
10.4.2 Test.....	15
10.4.3 Procedure.....	16
10.4.4 Requirement.....	16

10.5	Test-05: starting profile.....	17
10.5.1	Purpose.....	17
10.5.2	Test.....	17
10.5.3	Procedure.....	18
10.5.4	Requirement.....	18
10.6	Test-06: long term overvoltage.....	18
10.6.1	Purpose.....	18
10.6.2	Test.....	18
10.6.3	Requirement.....	19
10.7	Test-07: overvoltage with consumer components which may supply electrical energy	19
10.7.1	Purpose.....	19
10.7.2	Test.....	19
10.7.3	Requirements for part 1 and part 2.....	22
10.8	Test-08: decrease and increase of supply voltage.....	23
10.8.1	Purpose.....	23
10.8.2	Test.....	23
10.8.3	Requirement.....	23
10.9	Test-09: voltage ripples.....	23
10.9.1	Purpose.....	23
10.9.2	Test.....	24
10.9.3	Requirement.....	25
10.10	Test-10: reinitialisation.....	25
10.10.1	Purpose.....	25
10.10.2	Test.....	26
10.10.3	Requirement.....	26
10.11	Test-11: discontinuities in supply voltage.....	27
10.11.1	Purpose.....	27
10.11.2	Test.....	27
10.11.3	Requirements.....	28
10.12	Test-12: ground loss.....	28
10.12.1	Purpose.....	28
10.12.2	Requirements.....	32
10.13	Test-13: fault current.....	33
10.13.1	Purpose.....	33
10.13.2	Test.....	33
10.13.3	Requirement.....	34
10.14	Test-14: ground offset.....	35
10.14.1	Purpose.....	35
10.14.2	Test.....	35
10.14.3	Requirement.....	37
10.15	Test-15: short circuit in signal line and load circuit.....	37
10.15.1	Purpose.....	37
10.15.2	Test.....	37
10.15.3	Procedure.....	38
10.15.4	Requirements.....	38
10.16	Test-16: quiescent current.....	39
10.16.1	Purpose.....	39
10.16.2	Test.....	39
10.16.3	Requirements.....	40
Annex A (informative) Example of functional status and functional categories.....		41
Annex B (informative) Loss of GND_{48} using the example CAN communication.....		43

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 32, *Electrical and electronic equipment and general system aspects*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
