

UL 60947-1

STANDARD FOR SAFETY

Low-Voltage Switchgear and Controlgear – Part 1: General rules

UL Standard for Safety for Low-Voltage Switchgear and Controlgear – Part 1: General rules, UL 60947-1

Fifth Edition, Dated July 31, 2013

Summary of Topics

This revision of ANSI/UL 60947-1 dated May 6, 2019 is being issued to update the title page to reflect the most recent designation as a Reaffirmed American National Standard (ANS). No technical changes have been made.

As noted in the Commitment for Amendments statement located on the back side of the title page, UL, CSA and ANCE are committed to updating this harmonized standard jointly. However, the revision pages dated May 6, 2019 will not be jointly issued by UL, CSA, and ANCE as these revision pages address UL ANSI approval dates only.

Text that has been changed in any manner or impacted by UL's electronic publishing system is marked with a vertical line in the margin.

The requirements are substantially in accordance with Proposal(s) on this subject dated August 17, 2018.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

Commitment for Amendments

This standard is issued jointly by the Association of Standardization and Certification (ANCE), the Canadian Standards Association (operating as “CSA Group”), and Underwriters Laboratories Inc. (UL). Comments or proposals for revisions on any part of the standard may be submitted to ANCE, CSA Group, or UL at anytime. Revisions to this standard will be made only after processing according to the standards development procedures of ANCE, CSA Group, and UL. CSA Group and UL will issue revisions to this standard by means of a new edition or revised or additional pages bearing their date of issue. ANCE will incorporate the same revisions into a new edition of the standard bearing the same date of issue as the CSA Group and UL pages.

All rights reserved. No part of this publication may be reproduced in any form whatsoever without the prior permission of the publisher.

This Standard is subject to review within five years from the date of publication, and suggestions for its improvement will be referred to the appropriate committee. The technical content of the IEC and ISO publications is kept under constant review by IEC and ISO. To submit a proposal for change, please send the following information to inquires@csagroup.org and include ‘Proposal for change’ in the subject line: Standard designation (number); relevant clause, table, and/or figure number; wording of the proposed change; and rationale for the change.

To purchase CSA Group Standards and related publications, visit CSA Group’s Online Store at store.csagroup.org or call toll-free 1-800-463-6727 or 416-747-4044.

UL’s Standards for Safety are copyrighted by UL. Neither a printed nor electronic copy of a Standard should be altered in any way. All of UL’s Standards and all copyrights, ownerships, and rights regarding those Standards shall remain the sole and exclusive property of UL.

This ANSI/UL Standard for Safety consists of the Fifth Edition including revisions through May 6, 2019. The most recent designation of ANSI/UL 60947-1 as a Reaffirmed American National Standard (ANS) occurred on May 6, 2019. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, Title Page (front and back), or the Preface. The National Difference Page and IEC Foreword are also excluded from the ANSI approval of IEC-based standards.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL’s On-Line Collaborative Standards Development System (CSDS) at <https://csds.ul.com>.

CONTENTS

Preface	8
National Differences	10
FOREWORD	11
1 General	13
1.1 Scope and object	14
1.2 Normative references	15
2 Definitions	19
2.1 General terms	24
2.2 Switching devices	27
2.3 Parts of switching devices	29
2.4 Operation of switching devices	32
2.5 Characteristic quantities	35
2.6 Tests	41
2.7 Ports	42
3 Classification	42
4 Characteristics	42
4.1 General	43
4.2 Type of equipment	44
4.3 Rated and limiting values for the main circuit	44
4.4 Utilization category	52
4.5 Control circuits	53
4.6 Auxiliary circuits	54
4.7 Relays and releases	54
4.8 Co-ordination with short-circuit protective devices (SCPD)	54
4.9 Switching overvoltages	54
5 Product information	54
5.1 Nature of information	54
5.2 Marking	56
5.3 Instructions for installation, operation and maintenance	58
6 Normal service, mounting and transport conditions	59
6.1 Normal service conditions	59
6.2 Conditions during transport and storage	61
6.3 Mounting	61
7 Constructional and performance requirements	61
7.1 Constructional requirements	61
7.1.4DV.1 General	68
7.1.4DV.2 Isolation devices	68
7.1.4DV.3 Clamped joint test	69
7.2 Performance requirements	80
7.3 Electromagnetic compatibility (EMC)	90
8 Tests	91
8.1 Kinds of test	91
8.2 Compliance with constructional requirements	93
8.3 Performance	102
8.3.6DV.1 Breakdown of components test	130
8.4 Tests for EMC	130

Annex A (informative) Examples of utilization categories for low-voltage switchgear and controlgear

Annex B (informative) Suitability of the equipment when conditions for operation in service differ from the normal conditions

B.1 Examples of conditions differing from normal	175
B.1.1 Ambient air temperature	175
B.1.2 Altitude	175
B.1.3 Atmospheric conditions	175
B.1.4 Conditions of installation	175
B.2 Connections with other apparatus	175
B.3 Auxiliary contacts	175
B.4 Special applications	175

Annex C (normative) Degrees of protection of enclosed equipment

Introduction

C.1 Scope	176
C.2 Object	176
C.3 Definitions	176
C.4 Designation	176
C.5 Degrees of protection against access to hazardous parts and against ingress of solid foreign objects indicated by the first characteristic numeral	176
C.6 Degrees of protection against ingress of water indicated by the second characteristic numeral	177
C.7 Degrees of protection against access to hazardous parts indicated by the additional letter	177
C.8 Supplementary letters	177
C.9 Examples of designations with IP Code	177
C.10 Marking	177
C.11 General requirements for tests	178
C.12 Tests for protection against access to hazardous parts indicated by the first characteristic numeral	178
C.13 Tests for protection against ingress of solid foreign objects indicated by the first characteristic numeral	179
C.14 Tests for protection against water indicated by second characteristic numeral	179
C.15 Tests for protection against access to hazardous parts indicated by additional letter	180
C.16 Summary of responsibilities of relevant technical committees	180

Annex D (informative) Examples of terminals

Annex E (informative) Description of a method for adjusting the load circuit

Annex F (informative) Determination of short-circuit power-factor or time-constant

F.1 Determination of short-circuit power-factor	195
F.2 Determination of short-circuit time-constant (oscillographic method)	196

Annex G (informative) Measurement of creepage distances and clearances

G.1 Basic principles	197
G.2 Use of ribs	197

Annex H (informative) Correlation between the nominal voltage of the supply system and the rated impulse withstand voltage of equipment**Annex J (informative) Items subject to agreement between manufacturer and user****Annex K****Annex L (normative) Terminal marking and distinctive number**

L.1 General	208
L.2 Terminal marking of impedances (alphanumeric)	208
L.2.1 Coils	208
L.2.2 Electromagnetic releases	211
L.2.3 Interlocking electromagnets	213
L.2.4 Indicating light devices	214
L.3 Terminal marking of contact elements for switching devices with two positions (numerical)	215
L.3.1 Contact elements for main circuits (main contact elements)	215
L.3.2 Contact elements for auxiliary circuit (auxiliary contact elements)	216
L.4 Terminal marking of overload protection devices	222
L.5 Distinctive number	224
L.6 Marking of terminals for external associated electronic circuit components, contacts and complete devices	225
L.6.1 Marking of terminals for external associated electronic circuit components and contacts	225
L.6.2 Marking of terminals for external complete devices	232

Annex M (normative) Flammability test

M.1 Hot wire ignition test	237
M.1DV.1 Abnormal overload test (on equipment)	237
M.2 Arc ignition test	238

Annex N (normative) Requirements and tests for equipment with protective separation

N.1 General	241
N.2 Definitions	241
N.3 Requirements	242
N.3.1 General	242
N.3.2 Dielectric requirements	243
N.3.3 Construction requirements	243
N.4 Tests	243
N.4.1 General	243

N.4.2 Dielectric tests	244
N.4.3 Examples of constructional measures	245

Annex O (informative) Environmental aspects

O.1 Scope	246
O.2 Definitions	246
O.3 General considerations	248
O.4 Inputs and outputs to be considered	249
O.4.1 General	249
O.4.2 Inputs and outputs	249
O.4.3 Inputs	251
O.4.4 Outputs	251
O.5 Tools for including environmental impacts in product design and development	251
O.6 Relevant ISO technical committees	252
O.7 Guidance on environmental impact assessment (EIA) principles	252
O.8 Guidance on design for environment (DFE) principles	252
O.9 Reference documents	253

Annex P (informative) Terminal lugs for low voltage switchgear and controlgear connected to copper conductors

Annex Q (normative) Special tests – Damp heat, salt mist, vibration and shock

Q.1 General	256
Q.2 Classification of equipment	256
Q.3 Tests	257
Q.3.1 General test conditions	257
Q.3.2 Test sequences	258

Annex R (informative) Application of the metal foil for dielectric testing on accessible parts during operation or adjustment

R.1 Object	261
R.2 Definition of zones	262
R.2.1 General	262
R.2.2 Application of metal foil on accessible parts during normal operation or adjustment	262

Annex S (normative) Digital inputs and outputs

S.1 Scope	267
S.2 Definitions	267
S.3 Functional requirements	267
S.3.1 Rated values and operating ranges	267
S.3.2 Digital I/Os	268
S.4 Verification of input/output requirements	278
S.4.1 General	278
S.4.2 Verification of digital inputs	279
